J1 Adaptor - Fixed-line Telephone and USB VoIP Connection Adaptor for Accutone® Headset

T1 Adaptor

TELEPHONE & USB HEADSET SOLUTION.

Accutone® is proud to introduce the most convenient telephone & USB headset solution for small offices and call centers - **J1 Adaptor**. By pressing the large conversion switch, users can easily turn a telephone headset into an USB headset, with multi-colored LED indicator displaying the current mode of operation. J1 offers an 8-position pin-alignment switch for pairing with most system telephones on the market. Connect the J1 to your PC or Mac via the provided cable for instant usage without the need of any driver or software.

J1 is compatible with a wide variety of Accutone® telephone headsets, which are considered the most comprehensive selections in the industry, in terms of feature, reliability and audio quality. Equipped with speech-enhanced receiver and noise-cancelling microphone, pairing our headset with J1 will save you desktop space while providing two types of headset communication most office users demand nowadays.

J1 - Features Overview

Convergence	One headset for both fixed-line telephone and USB
Simplicity	One switch to press, no hassle or complications
Adaptability	Pair your headset to most system telephones
Ease of Mind	LED indications for telephone or USB operation
Cost-Effective	No need to buy two headsets for communication needs
Acoustics	Pair with Accutone® headsets for excellent voice quality
Durable	Strong mechanical structure designed for rough usage
